**In addition to offering a number of wines by the glass, we have included the units of alcohol you are likely to consume when purchasing a particular wine.**

The unit of alcohol referred to here is the one defined in the UK as being 10ml of pure alcohol.

For example, a 1 litre bottle of wine with an Alcohol By Volume (ABV) of 12% would contain 12 units ( $1000\text{ml} \times 12\% \div 10\text{ml}$  of pure alcohol).

If the bottle size were 75cl it would hold 9 units ( $750\text{ml} \times 12\% \div 10\text{ml}$  of pure alcohol).

A 250ml glass of wine would be 3 units of pure alcohol per glass ( $250\text{ml} \times 12\% \div 10\text{ml}$ ) and a 175ml glass of wine would be 2.1 units of pure alcohol per glass ( $175\text{ml} \times 12\% \div 10\text{ml}$ ).

125ml wine glass option available upon request.

Vintages correct at the time of printing. Prices effective from 1st May 2025.
